

ABOUT

Working at the intersection of UX/UI design and web development:
I research the problem, design the product logic and interface system, and turn the solution into code.
I build websites, web services, tools and bots, looking for automation opportunities in every project.
Developing with AI agents: I define the architecture, review the code and prototype, test and iterate.
Degree in Applied Informatics: algorithms, mathematics, computer graphics, design processes.

EXPERIENCE

- Gazprom Dobycha Nadym LLC** / Designer & Technical Specialist

Jun–Jul 2023

 - 3D visualization (Blender), layout of print and digital materials, photo retouching, thumbnail design
- Mimicry group** / Graphic Designer

Apr–Jun 2025

 - Presentation template design, logo redesign
- KiberOne** / Programming & IT Instructor

May–Jun 2026

 - Web development fundamentals (HTML, CSS, JavaScript) and visual programming
 - Working with AI tools: text models and media generators
 - Algorithms and programming logic for students of different skill levels
- Freelance** / UX/UI Designer & Front-end Developer

2023–present

 - Full product cycle: research, logic, interface, code and testing
 - Telegram bot and Mini App for order intake: modular order builder, cost estimate, technical specification and prepayment with no manager involved
 - Bracelet configurator for a jewelry store (Tilda Zero Block): product visualization, discount calculation, automated checkout
 - Browser-based dithering tool: stylization of 3D, 2D and text in a limited palette, AI background removal, code export for websites
 - Design and development of websites, landing pages and banners, including Tilda and Framer with custom code

EDUCATION

- NUST MISIS, Institute of Computer Science**

Applied Informatics in Design (09.03.03), Bachelor’s degree

2020–2025
- Bang Bang Education**

UX/UI Designer Plus

HARD SKILLS

- UX:** in-depth interviews, JTBD, CJM, user flows, user stories, feedback analysis
- UI:** prototyping, design systems and UI kits, responsive design, accessibility
- Web development:** HTML, CSS, JavaScript, React; Telegram bots and APIs in Python; Git
- AI development:** agentic development and subagents, spec-driven development, MCP integrations, routine automation / skills, context- and prompt-engineering
- Technical foundation:** algorithms, OOP, computer graphics, basics of C#, C++, Python, JS
- Graphics & 3D:** Figma, Blender, Photoshop, Illustrator, Tilda, Framer

LANGUAGES

Russian: native
English: B2 (Upper-Intermediate)

SOFT SKILLS

End-to-end ownership • Attention to detail • Fast learner • Teamwork
Meeting deadlines • Self-motivation • Creative problem-solving
